Priority Service
10% Discount on Plumbing Repairs

Weather changes...

Please help prevent run-outs by checking the gauge on your LP tank regularly and call when you want a delivery. We ask that you call when the gauge reads between 30-20% full. This gives enough time to get your delivery on a route. Running out of LP and requiring a same day delivery or re-routing a driver can add additional trip charges.

Propane Safety:

Service notification is required anytime you experience an interruption of your propane gas system. Furthermore, any scheduled or emergency interruption due to replacement, modification, repair or servicing of the propane gas system by any party other than Kerschner's Gas Service, Inc. requires such notice.

This includes replacing or installing gas appliances, changing the gas piping and/or any equipment from the appliance(s) to the propane tank (propane system) or any work that is performed which results in an interruption of the operation of the propane system in-part or its entirety.

Wisconsin State Statute 101.16(4) states:

(b) 1. A person who owns, leases, or uses a propane gas system and who is a customer of a retail supplier shall notify the retail supplier of the propane gas for the propane gas system of any interruption in the operation of the propane gas system due to the replacement, modification, repair, or servicing of the propane gas system by any other than the retail supplier. The customer shall provide the notice at least 7 days in advance of the interruption in the operation of the propane gas system, except as provided in subd. 2. The retail supplier or the person replacing, modifying, repairing, or servicing the propane gas system, shall perform a check for leaks or other defects in the propane gas system before placing the propane gas system back into operation in the manner required by rule. 2. If the interruption of the propane gas system subject to subd. 1. is due to emergency repair or servicing, the customer shall provide the notice to the retail supplier as soon as possible and no later than 24 hours after the repair or servicing is completed.
